## Havells India launches India's first Water Purifier with pH balance and Natural Mineral Fortification capability

*The "First of its kind" water purifiers performs consistently across varied geographies*

**New Delhi, 21<sup>st</sup> December, 2017:** Addressing the main yet widely unknown issue of loss of minerals in RO water, Havells India Limited today launched unique water purifiers that maintains the pH balance in water and adds a wide range of naturally occurring essential minerals and trace elements that are lost during the reverse osmosis (RO) process. With this launch, the company entered the not so penetrated water purifier segment with six product variants that are priced between Rs. 10,499 and Rs. 23,999.

In the usual reverse osmosis (RO) process, most minerals are lost while removing impurities and total dissolved solids (TDS) in many instance this leads to drop in pH of water. This low pH turns water acidic and corrosive thereby harming the human body. Havells Water Purifiers are intelligently designed to purify water through 100% RO and UV purification, maintain healthy pH levels and fortify it with necessary natural minerals through a special cartridge thus delivering fresh, safe and pure mineral water. The double UV purification ensures that water is kept fresh and safe at all times even during long storage of water in purifiers. Revitalizer in these purifiers makes water biologically active, this improves hydration and easy absorption in the body. These products have smart user interface and 'iProtect', a purification monitoring system that constantly monitors the purification process and ensures safe water & healthy water.

True to its brand promise of 'Making a Difference', Havells range of water purifiers for the first time in the country would offer safe, healthy and mineral rich drinking water to consumers at the all times. The promise would be delivered across six variants namely "Digitouch", "Digiplus", "Max", "Pro" and "UV Plus" that have been designed with clear focus on design excellence, technological advancements and consumer convenience. The product would also offer a host of advanced consumer convenience features such as programmable multi-fill options, feather touch consumer interface, alerts on performance, & preventive maintenance, operations and cartridge life.

Speaking on the occasion, **Mr Narendra Choudhary, Executive Vice President, Havells India Limited** said, "At Havells, we are committed to delivering innovative products that helps our consumers preserve good health and lead better lives. This enable us to develop products and services that meet specific needs of different segments of the population of our country's vast geographies. We take pride in announcing our foray into water purifier segment with products that are designed to offer safe and healthy drinking water. We are hopeful that our exclusive water purifier with pH balance and natural mineral fortification capability will be well appreciated by our customers and help us gain strong foothold in this category."

Havells water purifiers have been designed and developed at its R&D facility and manufactured at its state-of-the-art manufacturing plant in Haridwar with an installed capacity of half a million units per annum. With an expected growth of 15-20 per cent in this segment and aggressive plan to be a significant player, Havells' is fully equipped and future ready to ramp up the capacity to 1 million units per annum.

Havells water purifiers would be available across the country in a phased manner. The company will utilise its massive sales & distribution network and has created a dedicated ecosystem for after sales service. Service technicians have been trained for the in-house developed technology and would offer service in every part of the country. Customers would be able to reach through the toll free helpline of Havells that is served in 9 different languages.

**Speaking on the occasion, Mr Shashank Shrivastav, Vice President Havells India Limited, said, “We are extremely delighted to foray into the water purification segment and launch first of its kind water purifiers. With only 1 % of the country covered, this is an extremely under penetrated and much needed product, our products will address consumers need and we target to garner at least 10% market share in next 3-4 years”.**

He further added, “Our range of water purifiers are designed keeping Indian consumers and changing water conditions, especially new age pollutants such as pesticides & industrial waste in mind. These machines can automatically tune to the quality of input water and offer safe and healthy water. We are confident that consumers would love these aesthetically appealing and technologically superior offering from us”.

In line with the company ethos, the new range of water purifiers will carry unique performance benefits such as double UV purification, mineral fortification, revitalizer and unique conveniences such as programmable multi-fill options, feather touch consumer interface, alerts on cartridge life, performance & maintenance. There are a host of advanced consumer convenience features which interacts with consumers and gives alerts on preventive maintenance, operations and cartridge life.

#### **About Havells India**

Havells India Ltd. is a leading FMEG company (Fast moving electrical goods) with presence across India.
